Rome awards \$8 million contract to Syracuse Research

by Fran Crumb, Information Directorate

ROME, N.Y. — The Air Force Research Laboratory's Information Directorate has awarded an \$8,003,097 contract to Syracuse Research Corp. of North Syracuse.

The three-year agreement, "Advanced Fusion Workstation (AFWS) for Multi-Platform SIGINT Fusion and ISR Management," is intended to enhance signal intelligence and intelligence, surveillance and reconnaissance technology.

"The scope of this effort is to develop and/or integrate additional capabilities into the Advanced Fusion Workstation," said

Carolyn B. Sheaff, program manager in the directorate's Information and Intelligence Exploitation Division. "The AFWS is an AFRL government-owned, extensible SIGINT fusion system which assists real world operators in situational awareness and the identification of collection opportunities."

Syracuse Research Corp. engineers will demonstrate and transition the AFWS into the Distributed Common Ground System Transformation Center at Langley Air Force Base, Va. as well as other classified locations worldwide. @
